

AresX™ Infrared Thermal Imaging

Border & Coastal Defense Intelligent Photoelectric System

AresX™ Non-cooled vanadium oxide focal plane array detector makes the image more clear and detailed. It integrates a number functions such as target observation, battlefield surveillance, automatic warning, remote control and fire strike. High-precision motor drive and precision angle encoder servo enable detection, automatic identification, automatic tracking, automatic warning for moving targets.

The high-strength aluminum alloy casing makes the thermal imager withstand sea water corrosion, scale 12 wind and other harsh environments.
