

AresX™ Infrared Thermal Imaging

Handheld Low Light Night Vision

AresX™ Handheld Low Light Night Vision's 3x magnification, advanced optical system and high-performance ultra-generation-2 low-light level tube that produces bright images will give you clear, sharp observation effects.

The device is widely used in hunting, mountain climbing, fishing, camping, boating, observation and some outdoor activities in lower light, as well as night patrol, investigation and evidence collection for forest fire protection, police armed police, customs, border, anti-smuggling, drug enforcement and security guards. It is an idea device for police, armed police, SWAT and security guards for patrol.

SPECIFICATION

MODEL	CT-H4S
Image Intensifier Grade	Ultra-Generation-2
Magnification	3X
Field of View	12.5°
Observation Distance	800m
Resolution (Line pair)	57-64m
Eyepiece Diopter Adjustment Range	+2/-4
Dimensions	217*148*69 mm
Weight	850 (with battery)
Power Supply Type	A CR123A/3V lithium battery
Power Supply Voltage	2.8 ± 0.8
Working Hours	80 hrs (with infrared auxiliary light off)
	40 hrs (with infrared auxiliary light on)
Operating Temperature	-40°C ~ 60°C
25°C, Relative Humidity 25°C	98%
Protection Class	≥ IP67
Range of Focus	10 - ∞
Ocular Lens	Binocular
Quality Warranty	2
F Value	F ≤ 1.2
Negative Pole Type	18mmS-25
Negative Pole Sensitivity	≥ 550
