

AresX™ Infrared Thermal Imaging

Low Light Sight

AresX™ Low Light Sight is mainly used in military operations, border and coastal security guards, customs anti-smuggling and other snipe missions, and is an ideal device for the army, the armed police and SWAT.

6 x magnification, quasi-Generation 3 image intensifier, strong shockproof ability, high light transmittance, long distance from the pupil, precision tactical deviation/height adjustment, the fixture adaptable to various forms of firearms, anti-dust, rain-proof, light weight.

SPECIFICATION

MODEL	DN650G
Amplification Factor	6X
View Angle	9°
Objective Lens Diameter	72mm
Range of Focus	10 (m) ~ infinity
Exit Pupil Diameter	9 mm
Diopter	± 5
Image Intensifier Tube	Quasi-Generation 3
Resolution	62-72lp/mm
Observation Distance	> 450m
Power Supply Voltage	3V, a 3V lithium battery
Working Hours	60 hrs
Dimensions	318*98*112mm
Waterproofing Grade	IP67
Weight	1.35kg
