

AresX™ Monitor Equipment

360° Seamless Telescopic Video Check Mirror

AresX™ 360° Seamless Telescopic Video Check Mirror, is one kind of 7-inch colour-screen telescopic video check mirror with video recording function. Camera adopts telescopic hose structure that can be curved of 360 degrees. 3.6mm wide angle lens can be adjusted by any angles and it is convenient to carry. 7-inch multi-functional HD played LCD screen is adopted, so as to make search result clearer and more intuitive. It is one kind of visual life search tool widely used for security inspection, anti-terrorist and post-earthquake. Camera is provided with infrared light, so that is can be used under dark place or night.

Features & Advantages

This video displayer is designed with LCD of 90-degree rotation, so as to clearly and intuitively inspect picture.

Small superconductive hose that can be curled of 360 degree with wide-angle lens for observation within 120 degree of super-wide range, makes search vision no dead angle.

Sapphire camera lens, stainless steel camera shell and 12V LED camera fill-in light (LED light ON/OFF customized), make this instrument easily adapt to complex environments, such as dark and gap environment.

High-grade aluminum box packaging is more convenient for storage and maintenance of products.
